SunbriteTV RS232 Control Cable

July 17 2007 Preliminary

SIZE	FSCM NO	DWG NO		REV A1
SCALE		SHEET	1 OF 1	

IR Emitter placed over the IR Window

Figure 15

Cable end that will be attached to an external control block is routed over the Rubber Sealing Gasket of the Internal Connect Source. See proper Internal Connect Source instructions on Page 9.

12. IR Emitter Window - The Internal Infrared (IR) Control Window allows the TV to be controlled from a remote system using IR commands.

13. RS232 - The RS232 connection allows the TV to be controlled from a remote system using RS232 commands. (See Appendix A of this manual for a list of RS232 control commands and Appendix B for a Control Cable Pinout Diagram.)

14. 12 VDC - This port is for the SunBriteTV FM Radio (Item SB-FM 461) connector only.

Emitter Window:

Figure 15 shows an Emitter* installed. One end of the Emitter is to be mounted in front of the IR Emitter Window. The other end is to be connected to an appropriate control block*.

* Neither the emitter or control block are supplied by SunBriteTV. See instructions that come with your IR Emitter and control block to determine how to make the connection.

Important note: SunBriteTV recommends using a high-output IR Emitter, such as Xantech 282M.
