

Case Study

St. Edward's College improves their image with Herma products

The Background

The management of St. Edward's College – East Gosford NSW wanted to expand the number of rooms which had installed projectors and projection screens, in order further improve their teaching capability.

The Solution

They evaluated the projectors and screens on the market and chose to purchase ten Grandview Deluxe Pull Down screens and LP Morgan Skyhooks, which they are very pleased with.

Wendy Weir, their Maintenance Manager, is particularly impressed with the a few aspects of the Grandview Deluxe Pull Down. In particular, she likes:

- The way she can just pull down the screen, hold it for 3 seconds at the height she wants and it stays there.
- That, when the screen is being retracted, it automatically slows down as it gets towards the casing, in order to prevent damage.
- And particularly that the screen has mounting brackets that slide along the length in order to enable the matching of the brackets to ceiling or wall studs. This makes installation significantly quicker and simpler.

Customer Comment

Wendy said “we like the ease of installation of the Grandview Screens. They're a perfect match to the LP Morgan Skyhook projector mounts and we'll continue to buy nothing else but these products in future”.

Our brands

Worth staying home for.

When you or your customer simply want the best in a projector screen, then LP Morgan is the right choice. Our premium screen range, for when every detail counts.
